

How profitable is your training process?

QualitySensor allows organizations to create customized training evaluations and analyze the critical feedback needed to match their training offerings with their business needs.

QualitySensor will manage your online evaluations automatically.

QualitySensor generates evaluation forms, associates them with course sessions, stores and retrieves the evaluation results for management information.

Use of evaluation templates

Management of various evaluation forms: student evaluations, feed-back evaluation by manager, trainer evaluation.

An existing evaluation form can be used as a starting point.

Up to 100 questions per evaluation form

Support for different question types: scaled 0-10, memo, yes/no, scored multiple choice, not scored multiple choice, trigger questions.

Creation of evaluation forms in several languages

Samples of evaluation forms are provided in French, Dutch, English and German.

Mandatory answers to questions

By making an answer to any question mandatory, students and managers are forced to select an answer option before submitting a training evaluation.
